## Summary

Salesforce Developer with 9+ years of experience designing and implementing scalable solutions across the Salesforce ecosystem. Currently expanding into full stack development with modern workflows driven by prompting agentic LLMs to increase velocity. I'm seeking a Senior Salesforce Developer role where I can combine my Salesforce expertise, managed packaging experience, and AI-assisted development approach to build scalable, human-centered applications.

Skilled in Salesforce development practices, Apex, LWC, CI/CD methods with tools such as Jenkins and GitHub actions, with experience integrating and extending AppExchange managed packages. I have a strong understanding of Salesforce architecture, integrations with external data sources, security review, and deployments with modern package based development.

## AI-assisted Workflow

Having experience coding in enterprise software environments has given me a strong foundation to apply new LLM coding tools properly. I approach AI tooling with the knowledge that it can waste time as much as save it if not used correctly. It should be applied carefully and specifically. I have been using Cursor to prompt a variety of models to develop an application while managing context windows, creating rules for the project, and efficiently reviewing outputs.

Currently building a fitness web application with Cursor using React, Next.js, Typescript, and Tailwind for front end styling. Vercel is being used for hosting with Supabase for backend services. This project has allowed me to gain hands-on experience with agentic AI, setting up my own test environments and maintaining clean, scalable code.

## Professional Experience

**Guild, Denver CO** — *Salesforce Developer (Remote)* | Strengthened skills in CI/CD automation, managed package customization, and scalable Salesforce configuration with remote teams.

September 2022 - May 2024

- Updated CI/CD packaging model through github for daily deployments
- Collaborated with business staff to define project requirements
- Modified ETL model between AWS and Salesforce
- Wrote jest tests for frontend LWC testing
- Created omni channel configurations to route work across coaching team

**Virta Health, Denver CO** — *Salesforce Developer* | Gained expertise in cross platform integrations, performance optimization, and modern frontend architecture in a healthcare technology environment.

March 2021 - April 2022

- Updated Google Cloud Pubsub Salesforce subscription model for data efficiency
- Optimized lightning components in Salesforce for our patient admin team
- Wrote frontend code in our internal patient app built on React and TypeScript
- Used modern development stack including Docker, Kubernetes, Tilt and Storybook

**Slalom Consulting, Denver CO** — *Salesforce Consultant* | Built consulting expertise and technical versatility in multi-org environments, gaining exposure to different enterprise code base practices and secure deployment processes.

June 2019 - September 2020

- Directed Salesforce projects through execution of consulting approach and on-site visits
- Used different client DevOps pipelines and various CI/CD solutions
- Developed POC work during project discovery phases to support client buy in

**Zayo Group, Boulder CO** — *Salesforce Application Developer* | Developed a strong foundation in Salesforce customization, security, and testing practices within a large enterprise environment.

January 2015 - September 2018

- Managed user roles and permissions for different custom objects and record types
- Created custom components written in Apex and Visualforce
- Wrote unit tests in Apex to be compliant with Salesforce testing guidelines
- Modified and updated CPQ Price Books

## Certifications

[Salesforce Certified Platform Developer I](#)

[Salesforce Certified Agentforce Specialist \(2025\)](#)

## Education

[Colorado School of Mines, Golden CO](#) — *Bachelor of Science in Math and Computer Science*

Graduated December 2014

Areas of Study: Algorithms, Database Management, Data Structures, Elements of Computing Systems, Discrete Mathematics, Operating Systems, User Interfaces, Linear Algebra

## Technical Skills

**Salesforce:** Apex, LWC, Visualforce, SOQL, Managed Packages, Flows, Omni-Channel

### Languages/Libraries/Frameworks:

- |               |                     |                         |
|---------------|---------------------|-------------------------|
| • AngularJS   | • Java              | • React with TypeScript |
| • Bash        | • Javascript        | • Jest                  |
| • TailwindCSS | • MySQL, PostgreSQL | • Next.js               |
| • C++         | • Node.js           |                         |

### Tools:

- |                       |                |                          |
|-----------------------|----------------|--------------------------|
| • Cursor, Claude Code | • Github       | • Jenkins                |
| • MCP (GitHub, Figma) | • AWS (Lambda) | • Docker with Kubernetes |
| • VSCode              | • GCP Pub/Sub  | • Jira, Storybook        |
